## Year 5 Science Program

### Concord High School

Students in Year 5 are participating in a Science Program led by high school teachers from Concord High School.

The program consists of three 90-minute sessions.

On Tuesday 12<sup>th</sup> September, students in Year 5 participated in their first session at Concord High School. This session focussed on the 'Living World'. Students were highly engaged in various hands-on experiences using specialised equipment in the Science Laboratory. Students were also given the opportunity to observe and interact with various creatures such as a stymson python, bearded dragon, southern leaf tailed gecko and frogs.

Students thoroughly enjoyed the session and are looking forward to their subsequent learning experiences.
